Workshop on Intellectual Property & Technology Management in Healthcare & Life Sciences

Intellectual Property Rights (IPR), innovation, knowledge protection and technology transfer are emerging to be key drivers in businesses, however, very few academicians/researchers and Startups have the proper information and understanding of IP related matters.

To address this gap, the program is designed to create awareness on IPR related issues and to sensitise about the value and protection of IPR and its benefits. The participants will learn about the existing norms, procedures and formalities required for filing and maintaining IP in India and abroad and an understanding about the technology transfer and commercialisation.
