2.3.1: LIST OF STUDENT CENTRE METHODS

Nursing College		
STUDENT- CENTRIC METHODS USED	Yes/No	Activities
1. <i>Experiential learning</i>	Yes	The students are provided with learning experiences that enhances experiential learning by following the methods like Specialty Clinical posting where student learn nursing aspect of patient care. Students are taken for field visits in which the students visit, observe and write the report of the visits based on the objectives. Post graduates critically evaluate the visited Institutions as a part of their Nursing education course learning objective. Students are given opportunities for participating in health camps. Students do the return demonstration of procedures demonstrated by teachers to ensure that they have learnt it in right way. Students prepare the exhibits of various types and organize exhibitions like nutrition exhibitions, Audiovisual aids exhibition. Students are also given exposure of model Preparations either as a competition or as a group activity for their learning. When students are posted in the community they demonstrate healthy cooking methods. Students especially post graduates are involved in organizing workshops, conferences, in-service teaching, and Continuing nursing education programmes etc. The students take part in outreach programme, extension activities and in group or mass awareness programmes.
2. <i>Integrated/ Inter-disciplinary learning</i>	Yes	B.Sc nursing students are undergoing interdisciplinary courses like environmental science, Indian constitution, Gender equality, Self defense classes during the various time of their programme.
3. <i>Participatory learning</i>	Yes	Students are given the participatory learning experience by Group Discussion, Focus group discussion, Debate, Panel Discussion, Symposium and participating in Quiz.
4. <i>Problem solving methods</i>	Yes	Students are posted in different patient care settings and they are assigned to variety of patients where they learn by writing Care plans and Case studies, conducting Bedside clinic and

Programme name: MSc. Bioscience			
Sl. No.	Student- Centric Methods Used	Yes/ No	Activities
1.	<i>Experiential learning</i>	Yes	Skills are imparted through creating real life situations for the problems and thereby the student is put to exercise his capacity to execute the solution. The practical sessions and the project work are oriented to this.
2.	<i>Integrated/ Inter-disciplinary learning</i>	No	The programme involves several opportunities for the students to interdisciplinary learning. E.g. <ul style="list-style-type: none"> • Open electives (CBCS) offer opportunity to study different courses offered by the other specialization. • With chemists, the students learn the synthesis and physical and chemical characterization of the chemicals. • In toxicology: they are exposed to different sources of contaminants • The students have direct approach to the multidisciplinary team of research faculty and research scholars with who they learn different new things. • The close proximity of hospital setting exposure helps the students to get exposed to health science set up.
3.	<i>Participatory learning</i>	Yes	Student seminars, Journal Club presentations and practical sessions, and experiments with research scholars help them to be completely involved in the learning process. Group discussions and participatory learning in practical sessions help them
4.	<i>Problem solving methods</i>	Yes	Students are encouraged to come up with research/scientific problems and address them through group discussions or with experts in the field. Students may take forward these questions as short projects at their fourth semester. They are provided with appropriate guidance in Research methodology and result analysis and interpretations.
5.	<i>Self-directed learning</i>	Yes	Students are also encouraged to enroll for Swayam/ Coursera courses. They are given free access to internet for downloading the scientific/ technical materials of their interest. The new generation students are well prepared for self directed learning due to the-easy access to information technology.
6.	<i>Patient – centric and Evidence based learning</i>	Yes	NA
7.	<i>The Humanities</i>	No	NA
8.	<i>Project – based learning</i>	Yes	Semester 4 is exclusively for the Project work with 24 credits
9.	<i>Role play</i>	No	NA
